MEMORANDUM

28 Aug 2012

REF: DECABROMODIPHENYL ETHER DISCLOSURE

Dear Customer:

ITT Cannon LLC, is aware of the health and environmental risk regarding the use of the fire retardant, decabromodiphenyl (commonly referred to as decaBDE). For several years, the chemical has been and remain on ITT's "Black List" along with several other halogenated organic flame retardants such as polybrominated diphenyl ethers (PBDEs). Chemicals on the "Black List" are forbidden in production processes and products in ITT. If these substances are found, an action plan is immediately developed to eliminate the substance.

A full review of our chemical inventory throughout all of our facilities indicates no such use of decaBDE.

If you have any questions or concerns please do not hesitate to contact the undersigned.

Sincerely

A handwritten signature in black ink, appearing to read "Brian L. Warrick".
